

Final Project Poster Guidelines

Overview

Submission Deadline: June 3, 2026, 23:59

For the final project of this course, you are required to present your work in the form of an academic poster. We have provided a poster template for your convenience.

IMPORTANT: The entire poster must be written in English.

Content & Layout Requirements

1. Style and Internal Layout: While you are provided with a template, **you do not need to strictly adhere to its visual style (e.g., fonts, typography, or colors) or the internal layout.** You are fully free to adjust the size, proportion, and position of each bounding box to best fit your project's specific needs.

2. Poster Dimensions (Canvas Size):

CRITICAL: DO NOT change the overall page size (dimensions) of the template!

All posters will be uniformly printed for the final exhibition, so the canvas size must remain exactly as provided.

3. Required Sections: Regardless of your layout design, your poster **MUST** include the following essential sections:

- Title
- Author(s)
- Problem Statement
- Literature Review
- Methodology
- Experimental Results
- Conclusion

Grading Rubric (Total: 15 Points)

Your poster will be evaluated based on the following 4 criteria. Please read them carefully to ensure your poster meets the expectations.

Category	Points	Evaluation Criteria
Background	3 pts	(Problem Statement & Literature Review): Does the poster clearly define the inputs and outputs of the specific problem? Are the characteristics, strengths, or weaknesses of existing approaches properly discussed?
Methodology	5 pts	(Methodology): Are the steps of your proposed method clearly and logically stated? Does the poster discuss the main technical details necessary for reproducing the work?
Experiments	5 pts	(Experimental Results & Conclusion): Are the qualitative and/or quantitative results properly reported? Does the poster include a meaningful analysis of these results? Is the logical relationship between the empirical results and the analysis clearly demonstrated?
Exposition	2 pts	(Overall Presentation): Is the poster's layout well-organized and easy to read? Are the figures and visualizations intuitive and clearly explained? Is the amount of text reasonable (e.g., not overly dense or inappropriately sparse)?

Note: If you have any questions regarding the poster format or the grading rubric, please feel free to reach out to the Teaching Assistant.
